

AFTERCARE

For a safe healing process, follow our tattoo aftercare guide for tips on maintaining your tattoo's health and beauty.

DAILY CARE

Gently cleanse the tattoo with mild, unscented soap, and pat it dry with a clean towel afterwards.

Use recommended tattoo balm for moisturizing, and avoid petroleum jelly or oil-based products.

DURING HEALING PROCESS

Wash your hands before treating the wound. Do not scratch the tattoo.

Avoid (bubble, swim, steam) baths and saunas. Taking a shower is allowed.

Avoid exposing the tattoo to direct sunlight or tanning beds.

After healing, your skin stays sun-sensitive, so always use sunscreen.

HEALING TIME

With proper care, your tattoo should heal in approximately 6 weeks.

If the tattoo is covered with a sterile compress or cling film you can remove it after 3 to 5 hours.

A touch-up isn't always needed, but if necessary, contact your artist within 4 months.
